

LETTERS OF APPRECIATION

DTE Detroit Edison - Belle River Power Station

Team,

A great satisfaction survey for the work done at DTE Belle River this Spring! Some flattering remarks on the knowledge and support provided from our 1FS team and I wanted to send a note of thanks for the way in which you partnered to deliver for the customer!

With this being such a short cycled outage (1 month prior to start with award) the team dug in and worked through expediting the planning, getting the right resources staffed, and executed a long outage not only the planned scope but all the extra work on the generator managed by Charles Wolfe, and the turbine work lead by Jason Callahan--without issue.

This is such a great success story! Thanks for everything you do for our customers and I hope you are getting a chance to rest up this summer and I wish you the best as we all prepare for Fall.

Regards,

Chase Bortone

North Service Director
