Charlie,

I've been in this position now for less than two weeks, and this is already the second letter of positive feedback I have received as a result of your top-notch work. You are doing a great job and it is not going unnoticed. I greatly appreciate your efforts and professionalism. Keep up the good work.

Thank you,

David Ramey

Forwarded Message (from Bill Weber, referencing earlier feedback)

Some positive feedback on our generator repair efforts; Charles is a gen specialist out of COE that Dan Steingraeber managed to pull out of Chicago at short notice; the 2 winders were from Burlington Service Centre that were pulled off another job; repair materials from Burlington shop where we keep some inventory for readiness to

serve; Original Forwarded Message (from David McGregor, Brighton Beach Power, November 18, 2005 08:59 AM)GE,

Please convey our thanks and satisfaction to Charles Wolfe (particularly) and the team of winders who attended our site yesterday to carry out our ST Generator warranty repairs. They approached the job with professionalism and enthusiasm, and Charles displayed particularly good leadership and organizational skills. This is the kind of site performance we expect from GE.

Thanks and Regards,

Dave
